

PDF_Rex Job Options

Download Job Option “Rex_PDF_MASTER” to the desktop, launch Adobe Distiller, drag and drop “Rex_PDF_MASTER” into the Distiller window and select “Rex_PDF_MASTER” setting from the pull down menu.

Always make sure fonts are embedded and DO NOT use subset embedded fonts.

VERY IMPORTANT - Embed all fonts and convert all images to CMYK or Device N/As Is if it is a Spot format

Step 1: Launch Acrobat Distiller and set Default Settings to “Rex_PDF_MASTER.joboptions”

Step 2: In Quark, select Preferences - PDF - Create Postscript File for Later Distilling

Step 3: Select File - Export - Layout as PDF

Step 4: Select Options from the Export as PDF window and apply steps 5 thru 8

Step 5: Write a description of the job if wanted under Title

Step 6: Deselect all Hyperlinks

Step 7: Embed all fonts, NO SUBSETS, and do not compress any images

Step 8: Always Composite under Type, Print Colors should be CMYK if page is ripped as process, DeviceN or As Is for Spots

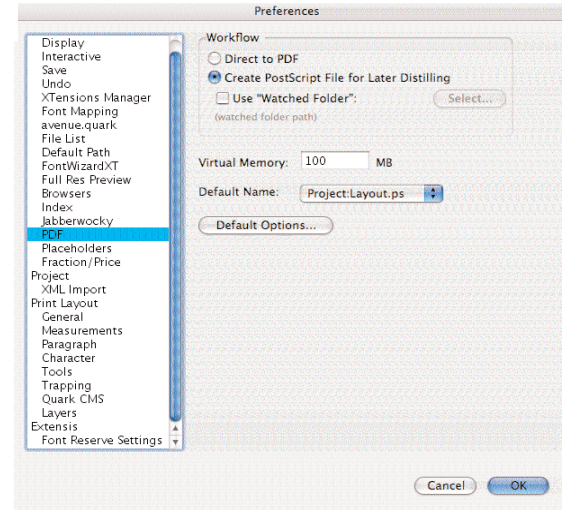

Save the postscript file and drag the postscript into Distiller using the “Rex_PDF_MASTER” Job option.
